

EXABEAM CLOUD CONNECTORS

EXTEND YOUR VISIBILITY

Exabeam Cloud Connectors provide turn-key log collection capabilities for popular cloud services such as Office 365, Box, Salesforce, Google Apps and more. With Cloud Connectors, Exabeam customers can extend the detection capabilities of their Security Intelligence Platform to include the logs and activity generated by cloud applications, thus preventing blind spots.

Cloud Connectors is designed for use alongside the log management, threat detection, and incident response capabilities of the Exabeam Security Intelligence Platform (SIP). Some popular use cases for Exabeam Cloud Connectors (CC) are:

COMPLIANCE

When used in conjunction with Exabeam Data Lake, Cloud Connectors becomes a powerful tool for compliance. With cloud application data ingested and stored in Exabeam Data Lake, it can be subject to the requisite security controls to ensure that compliance regulations are being met.

DETECTION

Exabeam Cloud Connectors makes it possible to easily ingest cloud user activity logs into Exabeam Advanced Analytics, the world's most deployed User and Entity Behavior Analytics (UEBA) tool. This means cloud applications are no longer blind spots which are safe from the scrutiny of threat detection.

RESPONSE

Through the use Cloud Connectors it becomes possible for cloud activity to trigger incident response with Exabeam Incident Responder or 3rd party IR tools. This greatly improves response times when dealing with incidents that span cloud and on premise systems.

KEY FEATURES

- Turn-key log collection for popular cloud applications including: Windows Azure, Salesforce, ServiceNow, Office 365, Amazon Web Services, Google Apps for Work, and others.
- Interoperability with the Exabeam Security Intelligence Platform

EXABEAM SECURITY INTELLIGENCE PLATFORM

Exabeam Cloud Connectors (ECC) is a key component in the Exabeam Security Intelligence Platform. Any of the platform components can be used together or separately with third party products. The platform includes:

- Exabeam Data Lake
- Exabeam Advanced Analytics
- Exabeam Threat Hunter
- Exabeam Incident Responder
- Exabeam Cloud Connectors

To learn more about these products, please visit www.exabeam.com/products to download whitepapers, datasheets, etc.

EXABEAM SECURITY INTELLIGENCE PLATFORM - OPERATING INFORMATION

- Deployable as a physical appliance (in multiple sizes) or as a cloud-ready virtual machine
- Includes out of the box collection agents and parsers for over 500 security data sources
- Agents operate on Windows or Linux platforms

For more information, please contact Exabeam at info@exabeam.com
