

EXABEAM SECURITY MANAGEMENT PLATFORM INTEGRATIONS

Inbound Data Sources for Log Ingestion and Service Integrations for Incident Response

The more data sources you have in your security incident and event management (SIEM), the better equipped you are to detect attacks. And the more security orchestration and automation response (SOAR) connections you have between your SIEM and your IT and security systems the quicker you can respond.

Exabeam Security Management Platform (SMP) has approximately 250 integrations with IT and security products to help your analysts work smarter - providing inbound integrations with data sources from vendors to easily allow you to ingest as much data as possible; and SOAR integrations with 3rd party vendors to help you automate and orchestrate your security response.

EXTENSIVE DATA SOURCES

Exabeam ingests data from approximately 200 different IT and security products to provide security analysts with the full scope of events. Exabeam Data Lake, Exabeam Advanced Analytics and Exabeam Entity Analytics ingest logs from various sources, including VPN, endpoint, network, web, database, CASB, and cloud solutions. After ingesting the raw logs, Exabeam then parses and enriches them with contextual information to provide security analysts with the information they need to detect and investigate incidents.

LIMITLESS SCALE WITH FLAT, PREDICTABLE PRICING

Every log and every security event matters. Not retaining your log data can create security blind spots that prevent compliance or leave your organization vulnerable to attack. Exabeam is designed to scale without penalizing you for the amount of data you ingest. Our flat pricing model is based on the number of users and devices in your environment, not data volume.

CENTRALIZED SECURITY AUTOMATION AND ORCHESTRATION WITH 3RD PARTY INTEGRATIONS

Exabeam Incident Responder integrates with approximately 60 third party IT and security products. These integrations help your analysts to gather evidence and attach them as artifacts to incidents or quarantine affected users and assets until incidents are mitigated.

List of Integrations as of February 2019

INBOUND DATA SOURCES FOR LOG INGESTION

- Application Security
- Authentication
- Cloud Access Security Broker (CASB)
- Cloud Infrastructure & Applications
- Data Loss Prevention (DLP)
- Database Activity
- Directory Service
- Email
- Endpoint
- Endpoint Monitoring
- Network Access Controller (NAC)
- Network
- Physical Access
- Privileged Account Management
- Unix/Linux/OSX
- VPN Servers
- Web Activity
- Web Security

INBOUND DATA SOURCES FOR LOG INGESTION

TYPE OF LOG	DATA SOURCES
APPLICATION SECURITY	<ul style="list-style-type: none"> • Onapsis

SERVICE INTEGRATIONS FOR INCIDENT RESPONDER

- Asset Discovery
- Cloud Infrastructure and Applications
- Endpoint Detection and Response (EDR)
- Email Protection
- Email Management
- Firewall
- Geolocation
- Identity Access Management (IAM)
- Information Technology Service Management (ITSM)
- Malware Scanning
- Mobile Device Management (MDM)
- Messenger
- Sandbox
- Security Incident and Event Management (SIEM)
- Threat Intelligence

SERVICE INTEGRATIONS FOR INCIDENT RESPONDER

PRODUCT AREA	PRODUCT	ACTIONS
ASSET DISCOVERY	Shodan	<ul style="list-style-type: none"> • Lookup domain • Lookup IP
CLOUD INFRASTRUCTURE AND APPLICATIONS	Amazon AWS EC2	<ul style="list-style-type: none"> • Add tag • Disable account • Enable account • Get EC2 tags • Get EC2 Security groups • Get EC2 details • Get EC2 instance • Monitor EC2 instance • Quarantine EC2 instance • Remove tag • Stop EC2 instance • Start EC2 instance • Terminate EC2 instance • Unquarantine AWS instance • Unmonitor EC2 instance
ENDPOINT DETECTION AND RESPONSE (EDR)	CarbonBlack Detect & Response	<ul style="list-style-type: none"> • Get file • Ban hash from endpoint • Get triage data • Delete file • Kill process
	CarbonBlack Response	<ul style="list-style-type: none"> • List alerts • List processes • Unblock hash • Get device Info • Unquarantine host • Hunt file
	Cisco AMP for Endpoints	<ul style="list-style-type: none"> • Search infected hosts • Get device info • Hunt file • Hunt IP

PRODUCT AREA	PRODUCT	ACTIONS
ENDPOINT DETECTION AND RESPONSE (EDR) - (CON'T)	Crowdstrike Falcon	<ul style="list-style-type: none"> • Hunt URL/domain • Get device info • Hunt file
	FireEye HX	<ul style="list-style-type: none"> • Get file • Get triage data • Hunt file • Get device information • Get containment state • Contain host
	McAfee EPO	<ul style="list-style-type: none"> • Add/Remove tag
	SentinelOne	<ul style="list-style-type: none"> • Change user password • Disable two-factor authentication • Enable two-factor authentication • Generate report • Get file reputation • Get device information • Get user information • Get File • List processes • Restart host • List reports • List applications on host • Scan host • Send email verification
	Symantec ATP	<ul style="list-style-type: none"> • Get File Reputation • Quarantine Device • Unquarantine Device
	Tanium	<ul style="list-style-type: none"> • List sensors • Run sensor • Get device info by IP • Get device info by hostname
	WMI WinRm	<ul style="list-style-type: none"> • Get installed applications from endpoint • Get installed applications from endpoint • Get processes from endpoint • Get triage data • Get recently opened files • Get file • Get recently run applications • Get removable device information <p>In addition to above, WinRm has these actions</p> <ul style="list-style-type: none"> • Get processes from endpoint • Get event logs (departed employee)
	ENDPOINT PROTECTION	Symantec EPP

ABOUT US

Exabeam provides security intelligence and management solutions to help organizations of any size protect their most valuable information. The Exabeam Security Management Platform uniquely combines a data lake for unlimited data collection at a predictable price, machine learning for advanced analytics, and automated incident response into an integrated set of products. The result is the first modern security intelligence solution that delivers where legacy security information and event management (SIEM) vendors have failed. Built by seasoned security and enterprise IT veterans from Imperva, ArcSight, and Sumo Logic, Exabeam is headquartered in San Mateo, California. Exabeam is privately funded by Lightspeed Venture Partners, Cisco Investments, Norwest Venture Partners, Aspect Ventures, Icon Ventures, and investor Shlomo Kramer.
