

Cyber Security

BUSINESS **SOLUTIONS** SHEET

Without a doubt cyberattacks are becoming more sophisticated and multi-faceted as cyber criminals outspend industry by a ratio of 10-1. According to Gartner analysts worldwide enterprise security spending will total \$96.3 billion in 2018, while the cybercrime community is spending over \$1 trillion. Attack complexity is growing, with incidents of lateral movement, secondary command and control and island-hopping all becoming concerning features of the business cyber risk environment.

Find out how RiverSafe can help organisations defend against this onslaught of relentless attacks...

RIVERSAFE
INTEGRITY, INNOVATION, IMPACT

ORGANISATIONS ARE SPENDING MORE ON SECURITY AS A RESULT OF REGULATIONS, SHIFTING BUYER MINDSET, AWARENESS OF EMERGING THREATS AND THE EVOLUTION TO A DIGITAL BUSINESS STRATEGY.

WHY RIVERSAFE?

RiverSafe has been delivering cyber security and threat management services to organisations across all vertical markets since it was founded in 2008. Our team of vendor-independent certified experts help our clients develop proactive ways to uncover and address threats to their environment. As a trusted advisor to many household names in the enterprise space, our capabilities stretch right the way across the security spectrum from risk assessments through to security architecture development to helping with incident and response management to security analytics and Secure Operations Centre (SOC) enablement.

INDUSTRY CHALLENGE

As the threat landscape continues to evolve so organisations implement more and more security technology, but regrettably it never seems to be enough. Unfortunately, there are always ways through even the most comprehensive layers of security protection. Add to this the mass of intelligence that security professionals are faced with consolidating and analysing and you can see how this has become an overwhelming, unyielding task.

But as organisations struggle to keep up, so they face an infinite number of choices, tools and avenues that they must consider when it comes to cybersecurity and protecting their infrastructure. Likewise security teams are overwhelmed by volumes of threat data. The challenge they face is how to intelligently process all that data to deliver actionable insights and empower teams to respond to cyber threats with precision and expertise.

OUR APPROACH MEANS THAT WE WILL ENSURE YOU UTILISE TOOLS BETTER

THE SOLUTION

At RiverSafe we develop effective cyber security analytics solutions for our customers that include:

- Security Information and Event Management (SIEM)
- Threat Intelligence
- SOC Enablement and Maturing
- Next-Generation Firewalls
- Intrusion, Prevention and Detection
- Web Application Security
- End-Point Detection and Response
- IoT Security
- Security Orchestration, Automation and Response (SOAR)
- User Behaviour Analytics (UBA)
- Cloud Security

Our compliance and audit related services include:

- Vulnerability Management
- Penetration Testing
- Risk Management
- Governance, Risk and Compliance
- GDPR

OUR APPROACH

Our robust security capabilities in effect ensure that we keep your IT working for you and not against you. We fully appreciate the intricate nature of end-to-end security requirements and our innovative approach helps to cut through the layers of complexity.

For example, we help our customers to improve the efficiency and reliability of their SOC. We can improve network security visibility and deliver a better RoI on your hardware, software and personnel. Our approach means that we will ensure you utilise tools better, while also seamlessly integrating your existing security tools with your overall infrastructure in order to help reduce incidents. Our security analytics capabilities, facilitated by tools such as UBA, Next-Generation SIEM and SOAR, will enable you to see the wood for the trees and reduce the number of false positive alerts.

We work in an open and transparent way, usually starting any assignment with discovery audits and assessments of your current position. We provide our customers with accurate data, tools and a robust plan to support a viable way forward, making short-term operational and long-term strategic recommendations.

Our experts will also provide training for your IT and security teams based on the specific requirements of your enterprise. Our solutions will be documented based on your organisation standards and we will ensure we only use the best security practices in order to help solve your most pressing security needs.

ONE OF OUR CUSTOMERS, A HOUSEHOLD TELECOMMUNICATIONS COMPANY, NEEDED TO PERFORM ON-DEMAND THREAT HUNTING. RIVERSAFE HELPED THE SECURITY TEAM TO UNDERTAKE A FULL SECURITY AUDIT TO ASSESS THE ENVIRONMENT AND DECIDE HOW BEST TO UTILISE VARIOUS SECURITY TOOLS.

ABOUT RIVERSAFE

RiverSafe provides Cyber Security and Analytics services to ensure customers can see and respond to the security threats across their digital enterprise. We enjoy strong partnerships with many market leading vendors enabling us to provide high-value customer solutions. RiverSafe drives innovation for our customers which has enabled us to sustain our continued growth. We have a strong track record of delivering results – largely down to our team of highly experienced consultants with a reputation for delighting customers.
