

Make PCI Compliance Processes Easier

SCENARIO:

The customer does not know how to leverage Exabeam to meet the PCI Data Security Standard (DSS), or how to customize Exabeam output to best align with internal compliance processes and procedures.

SOLUTION:

Following a short assessment, Grant Thornton deploys use cases relevant for PCI compliance, customizes asset ingestion in Data Lake to focus on in-scope systems for PCI, and modifies pre-built reports and dashboards to align with a customer's existing compliance procedures.

WHAT PAST CUSTOMERS HAVE ACHIEVED:

- Efficiencies meeting PCI DSS requirements, including real-time reporting and reduction of manual methods to demonstrate compliance.
- Grant Thornton demonstrated their PCI expertise to help the customer.
- Data quality for ingested sources was improved, making incident detection and response easier and faster.

WHAT ARE GRANT THORNTON'S COMPLIANCE SUPPORT SERVICES?

- **ASSESS** existing processes for compliance reporting.
- **DEPLOY** pre-built PCI reports and dashboards in Data Lake.
- **CUSTOMIZE** Exabeam content and ingest assets to align with the customer's reporting requirements.
- **OPERATIONALIZE** output through integration into existing procedures for both compliance reporting as well as incident management.

WHAT'S THE ESTIMATED LEVEL OF EFFORT?

- Duration of 2 weeks
- 1 PS engineer and 1 part-time manager for oversight
- Customer support team of compliance manager, SOC manager, and SOC analysts contribute approximately 15-20% of their time.
