**Grant Thornton**

# Exabeam Deployment and Integration Services

Leverage Grant Thornton's dedicated team of Exabeam accredited engineers to maximize your Exabeam investment.

## Solution Benefits

✓ Lessons learned from the trenches. Our expertise and knowledge base can be used as accelerators streamline the implementation process.

✓ Our deep understanding of the Exabeam platform will allow us to advise you on leading practices to follow and common misconfigurations to avoid for a successful implementation.

✓ Integration experience to guide success by avoiding items that sound good but don't work and the reason why.

Grant Thornton has been an alliance partner with Exabeam since 2018.  Since then our team of specialists have executed over 60 different Exabeam deployment and implementation engagements helping clients solve complex cyber challenges; which include creation of efficient cyber threat monitoring solutions for security operations, bolstering insider threat programs, and building unique cyber fraud detection capabilities.   Our deeply qualified teams bring the right mix of technical expertise and operational acumen to align your Exabeam investment with your overall program goals and objectives.

**Experienced Staff**  - Our team members are comprised exclusively of Exabeam Accredited Engineers dedicated to providing deployment and implementation services for Exabeam's entire product suite.

**Lessons Learned**  -  Our services and recommendations are based on lessons learned in the field performing this work, not theories. Our deployment and integration services experience guide success by avoiding items that sound good but don't work and knowing the reason why.

**Insight Into Cyber Risks** -  Our purpose-built content and models align implementations to leading risk areas such as insider threat, cyber fraud, and cyber operations automation.

When Grant Thornton implements  Exabeam for your organization, our team of specialists will prepare for the various aspects of the Exabeam solution to ensure details and dependencies for your environment are identified and addressed. From planning out data source quality, use cases analysis, and training of your staff, our team will leverage their expertise to provide a solution that your team is ready to operate day 1 to support your environment.

## Grant Thornton's  Exabeam Services

### Deployment and Integration
Deployment and integration of data sources into Exabeam products for your organization

### Managed Cyber Analytics
Continuous managed detection and response services leveraging your Exabeam solution

### Solution Management Service
Managed engineering and custom content support for your Exabeam solution

### Custom Engineering and Integration
Bespoke use cases and content engineering services for your Exabeam solution

# Grant Thornton's Deployment Approach

## Planning

- Conduct initial kickoff meeting and review project plan
- Review data sources, use cases, and workflow requirements
- Conduct log feed engineering and planning including the deployment planning for site collectors where required
- Review data retention requirements

Key Outputs:
- Implementation project plan

## Integration

- Initiate platform onboarding (system access, platform health check, current state data sources and use case configuration review)
- Configure log feeds for data source integration
- Review data parsing and modify data source ingest as required
- Build out requested dashboards and reports
- Review and tune risk scoring for environment, adjust based on feedback and analysis

Key Outputs:
- Deployment review with client staff

## Review and Training

- Final reviews of data sources and risk scoring
- Conduct client training on solution usage and use cases deployed
- Finalize engineering deployment document and review with client staff
- Conduct project close out meeting

Key Outputs:
- Solution turned over to client staff
- Solution Engineering Document completed

## Why Grant Thornton?

- ✓ Exabeam accredited services partner with direct access to Exabeam's engineering, product development and customer support teams
- ✓ Experience and expertise with the implementation and operation of Exabeam technologies for numerous programs including, AA, EA, DL, and IR/CM
- ✓ Specific risk models and workflows built for Exabeam to support cybersecurity programs
- ✓ Backed by a national team of cybersecurity and privacy professionals to meet the needs of your cyber program
