The more data sources you have in your security incident and event management (SIEM), the better equipped you are to detect attacks. And the more security orchestration and automation response (SOAR) connections you have between your SIEM and your IT and security systems the quicker you can respond.

Exabeam Security Management Platform (SMP) has approximately 500 integrations with IT and security products to help your analysts work smarter –providing myriad of inbound of data sources from many vendors including cloud applications; and SOAR integrations with 3rd party vendors to help you automate and orchestrate your security response.

EXABEAM SECURITY MANAGEMENT PLATFORM INTEGRATIONS

Inbound Data Sources for Log Ingestion and Service Integrations for Incident Response

EXABEAM INTEGRATIONS:

EXTENSIVE DATA SOURCES
Exabeam ingests data from over 400 different IT and security products to provide security analysts with the full scope of events. Exabeam Data Lake, Exabeam Advanced Analytics and Exabeam Entity Analytics ingest logs from various sources, including VPN, endpoint, network, web, database, CASB, and cloud solutions. After ingesting the raw logs, Exabeam then parses and enriches them with contextual information to provide security analysts with the information they need to detect and investigate incidents.

BEHAVIORAL ANALYTICS EXTENDED TO THE CLOUD
Exabeam Cloud Connectors are pre-built connectors that enable security teams to easily collect logs from over 40 popular cloud services such as AWS, GitHub, Google, Microsoft, Salesforce and others. They allow enterprises to detect threats using behavior analytics in their cloud applications. They also extend any compliance-based security requirements to the cloud.

CENTRALIZED SECURITY AUTOMATION AND ORCHESTRATION WITH 3RD PARTY INTEGRATIONS
Exabeam Incident Responder integrates with approximately 85 third party IT and security products. These integrations help your analysts to gather evidence and attach them as artifacts to incidents or quarantine affected users and assets until incidents are mitigated.
INBOUND DATA SOURCES FOR LOG INGESTION

List of Integrations as of November 2020

- Authentication and Access Management
- Applications Security and Monitoring
- Cloud Access Security Broker (CASB)
- Cloud Security and Infrastructure
- Data Loss Prevention (DLP)
- Database Activity Monitoring (DAM)
- Email Security and Management
- Endpoint Security (EPP/EDR)
- Firewalls
- Forensics and Malware Analysis
- Information Technology Service Management (ITSM)
- IoT/OT Security category
- Network Access, Analysis and Monitoring
- Physical Access and Monitoring
- Privileged Access Management (PAM)
- Security Analytics
- Security Information and Event Management (SIEM)
- Threat Intelligence Platform
- Utilities/Others
- VPN Servers
- Vulnerability Management (VM)
- Web Security and Monitoring

In addition to the above integrations, the Exabeam Security Management Platform allows analysts to take many more actions directly. If you have questions about integrations not mentioned in this document, please send an inquiry to sales@exabeam.com.

ABOUT US

Exabeam is the Smarter SIEM™ company. We help security operations and insider threat teams work smarter, allowing them to detect, investigate and respond to cyberattacks in 51 percent less time. Security organizations no longer have to live with missed distributed attacks and unknown threats, manual investigations and remediation, or excessive storage fees. With the modular Exabeam Security Management Platform, analysts can use behavioral analytics to detect attacks, automate investigation and incident response, and reduce storage costs. Exabeam Smart Timelines, sequences of user and device behavior created using machine learning, further reduce the time and specialization required to detect attacker tactics, techniques and procedures. For more information, visit www.exabeam.com.

Exabeam, the Exabeam logo, Threat Hunter, Smarter SIEM, Smart Timelines and Security Management Platform are service marks, trademarks or registered marks of Exabeam, Inc. in the United States and other countries.
